

DATE OF ADVERTISEMENT: 25 January 2022

POSITION: Geoenvironmental Consultant /Senior Consultant

FWS CONSULTANTS LTD: Unit 2 City West Business Park, St John's Road, Meadowfield Ind Est, County Durham, DH7 8ER

PREFERRED QUALIFICATIONS: BSc and MSc or PhD in either Geology, Engineering Geology, Geotechnical Engineering, with or working towards Chartered status

PREVIOUS PROFESSIONAL EXPERIENCE: around 5 years

Role: FWS Consultants Ltd is an established UK Geo Environmental and Geological Consultancy, engaged in geotechnical, geo-environmental engineering and mining. Our Geotechnical and Environmental Team provides a broad range of design and construction management services to clients over a diverse range of market sectors including residential, commercial, industrial development, waste management, mining and minerals extraction

An experienced, innovative and commercially aware Engineering Geologist or Geotechnical Engineer is required to assist in expanding and developing the geo-environmental engineering services in Durham or Sheffield from our office in Durham. The candidate is to have an aptitude in business development, a high level of ability in project management, report writing, and design experience in construction and land reclamation.

MANAGERIAL CAPABILITIES AND RESPONSIBILITIES:

This position for the Durham Office will assist in the management and development of geo-environmental services in the Northeast of England down to the Midlands. This position will entail a managerial role within the Company and, as such, the candidate should have the following managerial capabilities:-

- Planning, budgeting and financial management at project level.
- Preparation of proposals and tender bids.
- Undertaking a managerial role to expand, develop and sustain the budgetary, technical output and performance of the geotechnical and geo-environmental services, with experience and knowledge of the Scottish market.
- Client management and progressing marketing initiatives within the Northeast and Midlands regions.
- Team leadership, staff training, management and development.

TECHNICAL CAPABILITIES

Candidates should be able to demonstrate an understanding and capability in a number of the following areas:-

- Design, coordination and reporting on desk studies, mining risk assessments, geotechnical / environmental investigations, logging of soil and rock to BS5930, to provide engineering designs for earthworks, foundations, slopes, retaining walls, ground improvement, waste management and reclamation of derelict land.
- Contract management of site investigations, ground engineering, earthworks and land reclamation, including scheduling contamination and geotechnical samples.
- Undertaking and checking detailed geotechnical and environmental design calculations and assessments.
- Preparation of design specifications, contract documentation, factual and interpretative reports to current design standards.
- Full driving licence.

FWS Consultants Ltd is an equal opportunities employer.
